

Announcing the Learning Collaborative Intranet

Get Connected! With all your collaborative partners from across the country!

<http://intranet.nctsn.net.org>

A password protected "intranet" site has been set up to provide a common workspace and information-sharing forum at for all participants of the National Breakthrough Series and Regional Learning Collaboratives. The site is currently being populated so feel free to browse as soon as you receive your log in information.

The site will feature the following:

- o Events Calendar – one master calendar for all Learning Collaborative activities
- o Learning Session Meeting Space – to share documents, agendas, tasks, bulletins, list of attendees, etc. with your Learning Collaborative team members.
- o Contacts/Participants Database – will include all Learning Collaborative participants. Each person can be designated as part of one or several Learning Collaborative teams.
- o Announcements – for all general updates on NCTSN training and adoption activities including the NCTSN Training and Adoption Bulletin.
- o Links – a place to post helpful or interesting website addresses for others to visit
- o Tasks – lists of items that can be assigned to a particular team or person
- o Meeting Space – members with MSN passports can sign on simultaneously to "meet" online and work in a common space.
- o Document Upload/Share Space – members can upload any documents to be shared with their team. You can also create a workspace to share comments or post your input on a particular document. For instance, you can post a MS Word survey and each participant can post their completed survey.
- o Online/Dynamic Survey/PDSA cycles/Collaborative Measures – There will be the capability to post certain monthly updates PDSA cycles and required measures in an online survey so that real-time progress can be charted and compared in Excel spreadsheets and graphs.

We expect to be able to register new members by the first week of August. Each participant in the learning collaborative will receive login and password information directly from Peter Kung, Webmaster.
